Figure 2. A-C: The search interests of COVID, "COVID heart" and COVID pneumonia" in Google Trends were 12 to 13 days lagged from COVID-19 daily new cases/incidence (Pearson's r= 0.977, 0.982 and 0.973, respectively, *P*<0.001 for all).
D-F: The search interests of COVID, "COVID heart" and COVID pneumonia" in Google Trends were 19 to 20 days lagged from COVID-19 daily new deaths (Pearson's r= 0.967, 0.977 and 0.972, respectively, *P*<0.001 for all). Note, d12, d13, d19 and d20 indicate the trend curves were shifted for 12, 13, 19 and 20 days, respectively, to compensate being lagged.
